Budget Justification Summary

This \$660,000 annual budget reflects the true cost of operating a credible, community-rooted violence interruption program at scale. Personnel — the program's single largest investment — accounts for 67% of the total budget. This proportion is intentional: GOODZone's model is human infrastructure. The program's effectiveness rests entirely on the daily relational presence of 25+ Credible Messengers, Crisis Intervention Specialists, and Outreach Workers who have earned trust in the communities they serve.

GOODZone does not operate in an office. It operates on streets, in stairwells, and at hospital bedsides — in the moments that determine whether a cycle of violence continues or ends. Program operations and transportation costs reflect this mobile, responsive model. Data and evaluation investments ensure that GOODZone can demonstrate its impact with rigor, connecting program activity directly to reductions in violent crime in MPD PSA 105 and neighboring corridors.

Indirect costs at 10% are below the nonprofit sector benchmark of 15–20%, reflecting GOODProjects' commitment to maximizing every dollar toward direct community impact while maintaining the organizational systems necessary for accountability, compliance, and long-term sustainability.
