1. Who We Are & The 10-Year Foundation

GOODProjects is a Washington, D.C.-based nonprofit founded in 2016 with a singular mission: to empower underserved families to break cycles of intergenerational poverty by providing resources, tools, and holistic support to achieve financial independence and build generational wealth.

We operate on the principle that economic mobility requires addressing both skills gaps - financial literacy, entrepreneurship training and systemic barriers such as lack of childcare, mental health challenges, and social isolation. We practice equity by eliminating barriers rather than asking people to overcome them.

Over the past decade, we have developed an integrated, end-to-end continuum of care that surrounds families with support at every stage — from the front door of social services to the safe spaces of after-school programming to the street corners where violence disrupts lives. This is not a collection of isolated programs. It is a single, seamless ecosystem of care, refined, tested, and proven in Ward 6 over ten years.

2. The Depth of Our Impact - What 10 Years Has Built

Our four-phase model has produced measurable, validated results that demonstrate the depth of long-term, holistic intervention:

Violence Interruption

- 45% reduction in violent crime in PSA 105 (2023–2024), compared to a 12% increase citywide, validated by independent MPD data analysis.
- Over six years, the GOODZone recorded only 249 violent incidents, compared with 601 in the neighbouring Navy Yard area.

Family Stabilisation

- 300+ families stabilized annually through FSP coaching, benefits navigation, and economic mobility support.

Youth Development

- 400+ youth served daily at King Greenleaf Recreation Centre through high-dosage tutoring, mentorship, and enrichment.

Alumni Employment & Economic Mobility (2026 Priority)

A key focus this year is tracking our alumni families and youth we have served to document where they are in life today. Employment, educational attainment, housing stability, and financial independence: these outcomes are the truest measure of sustainable, generational change. Social Return on Investment (SROI) data will form the cornerstone of our donor engagement and advocacy strategy going forward.

Numbers don't lie. Our alumni stories will demonstrate that the change we create flows back into the community.

3. The Model - A Four-Phase Continuum of Care

Every phase of our continuum is rooted in the Family Success Planning (FSP) framework, ensuring no participant falls through the cracks. The model follows a single, unbroken value chain — from stabilisation to protection, to intervention, to employment.

Phase	Program	What It Does	Who It Serves
I — Stabilize	Family Success Planning (FSP)	Comprehensive coaching: emergency stabilization, benefits navigation, financial literacy, employment support, barrier removal. Every family receives a dedicated Family Success Coach and a customized Family Success Plan.	Parents & caregivers; youth 14–24
II — Protect	GOODLearning Hub Afterschool	Afterschool safe harbour: high-dosage tutoring, Youth Services Advocates, Social-Emotional Learning, peace circles, daily family touchpoints. Children of FSP-enrolled families are automatically connected.	Youth ages 5–14
III — Intervene	GOODZone Violence Interruption	Street-level outreach, conflict mediation, rapid crisis response within 48 hrs of any shooting, and on-the-ground workforce connections. Credible Messengers bring the hardest-to-reach into the continuum.	Young adults 18–35; high-risk community members
IV — Employ	JUMPSTART: Youth Workforce Development	Alumni tracking, Career Launchpad training, paid internship placement with GOODZone Business Partners, permanent job transition, and 90-day retention support. Converts Hub graduates into employed, economically self-sufficient adults.	GOODLearning Hub alumni ages 14–24

Phase I: Entry Point - Family Success Planning (FSP)

The cycle of intergenerational poverty cannot be interrupted without first stabilizing the home. A child cannot learn if they are hungry, housing insecure, or witnessing trauma.

Each family is paired with a dedicated Family Success Coach who builds a customized plan addressing:

- Immediate Stabilization: Emergency food, housing, utility assistance; ID recovery; benefits navigation (Medicaid, SNAP, TANF); behavioural health and primary care connections; childcare support.
- Economic Mobility: Workforce readiness, job placement, financial literacy coaching, entrepreneurship training, and wealth-building tools, including whole-life insurance policies.
- Youth Engagement: Automatic enrolment of school-aged children into the GOODLearningHub; access to therapy, Social-Emotional Learning, and mentoring.

Phase II: Safe Harbour - GOODLearningHub Afterschool Services

The hours between 3:30 PM and 6:30 PM are when youth are most at risk. The GOODLearningHub, housed at King Greenleaf Recreation Centre, provides:

- Academic Support: High-dosage tutoring in literacy and math using evidence-based curricula (UFLI Foundations, Science of Reading, IXL adaptive learning); small-group and one-on-one instruction; real-time progress monitoring.
- Mentorship & Social-Emotional Support: Each youth is assigned a Youth Services Advocate (YSA) who monitors attendance, liaises with teachers, and provides social-emotional coaching.
- Family Connection: Daily touchpoints between YSAs and families, creating a continuous feedback loop between the home and the Hub.

Phase III: Community Shield - GOODZone Violence Interruption

Violence is a public health crisis driven by unaddressed trauma, idleness, and economic despair. The GOODZone is the outward-facing, mobile arm of the continuum, operating across Ward 6 and Ward 8.

- Street-Level Outreach & Conflict Mediation: Daily presence in identified hotspots; real-time dispute mediation to prevent retaliation.
- Rapid Crisis Response: Within 48 hours of any shooting or major conflict, the team activates to stabilise individuals and families, provide trauma counselling, and link them to FSP coaches.
- Workforce & Income Stabilisation: On-the-ground connections to job placements, ID recovery, and immediate needs — replacing idling with purpose and a pathway.

Phase IV: Closing the Loop - JUMPSTART Youth Workforce Development

Every year, GOODLearningHub alumni age out of our afterschool safe harbour. Without a structured bridge from our programs to a paycheck, they face the same environment that made their families vulnerable in the first place — now without the safety net that protected them.

JUMPSTART is the fourth and final phase. It does not create new programs for new people. It formalises existing work: pulling alumni back into the ecosystem as mentors, interns, and employees, while connecting them to GOODZone Business Partners who are ready to hire. It is the moment we return on every hour of tutoring, every coaching session, and every crisis intervention.

Target Population

- Age 14–24; alumni of GOODLearningHub with an active FSP relationship
- Ward 6 / Southwest Washington, D.C.
- Caregivers who intentionally enrolled their children and remain engaged in FSP coaching
- Post-program youth facing idling, economic despair, and risk of re-engagement with street networks

The Four-Stage Alumni Pathway

Stage 1 - Alumni Tracking & Intake (Weeks 1–2): Proactive outreach, intake assessment, mapping current status and barriers; dedicated coach assigned with weekly contact throughout.

Stage 2 - Career Launchpad Training (Weeks 3–4): 40-hour intensive curriculum covering resume building, interview coaching, professional communication, financial literacy, workplace etiquette, and SEL sessions reinforcing self-regulation and conflict resolution.

Stage 3 - Paid Internship Placement (Weeks 5–10): Direct placement with a GOODZone Business Partner employer. Youth earn \$15/hour, 20 hours/week for six weeks building a work record, professional reference, and employer relationship. Trauma-informed wellness check-ins continue weekly.

Stage 4 - Placement & 90-Day Retention (Weeks 11–24): A dedicated Placement Coordinator supports the transition from internship to permanent hire. Retention tracking ensures each alumnus is stable in their role.

The Two-Generation Anchor

While youth move through the JUMPSTART pathway, their parents and caregivers remain enrolled in Family Success Planning, continuing to receive financial literacy coaching, employment support, and barrier reduction services. A stable household is the single most powerful predictor of successful youth employment transitions.

4. The Integrated Ecosystem in Action: Case Studies

A real-world illustration of how the four phases interlock:

- Ms. Jones (FSP): Referred by her resident council leader, her Family Success Coach secures childcare subsidies, Medicaid enrollment, ID recovery, and financial literacy training. Her children are enrolled in the GOODLearningHub.
- Marcus, age 10 (GOODLearningHub): His YSA identifies that he is withdrawn and struggling with reading. Targeted tutoring and peace circles improve his grades, confidence, and social connections.
- Terrell, age 19 (GOODZone → JUMPSTART): Ms. Jones's nephew, identified as being involved in a neighbourhood conflict, is engaged by a Credible Messenger. Existing trust — built through his family's connection to GOODProjects — enables mediation. Terrell connects with an FSP Coach, completes his GED, enrolls in JUMPSTART, secures a paid internship, and is permanently hired by a GOODZone Business Partner.

The Outcome: Ms. Jones is on a path to financial independence. Marcus is reading at grade level. Terrell is employed and disconnected from the street economy. A neighbourhood conflict was mediated before it turned deadly.

5. The Social Shared Value Chain

JUMPSTART and the full GOODProjects continuum operates on a shared value model. Every stakeholder contributes something. Every stakeholder gains something.

Stakeholder	What They Invest	What They Receive
GOODProjectsDC	Nine years of wraparound services, alumni relationships, staff expertise, and program infrastructure	Pipeline completion; alumni employment as organizational proof of impact; long-term community trust
Families	Years of intentional investment; continued FSP engagement	Children who are employed and self-sufficient — the goal they enrolled for
GOODZone Business Partners	Paid internship placements; permanent job offers for proven alumni	Pre-vetted, trauma-informed, work-ready hires who arrive with GOODProjectsDC's relationship backing and retention support
DC District Government	Policy validation; overhead infrastructure support; D.O.E.S. employer network access	A replicable, data-validated model that demonstrably reduces youth unemployment and community violence in Ward 6
Alumni Participants	Commitment, time, and effort through the program	A paid internship, a professional reference, a permanent job, and economic independence
Ward 6 Community	10 years of social trust in GOODProjects	Reduced violence, increased economic activity, and young people contributing as earners rather than idling

6. Unique Indicators of Impact

Youth-to-Mentor Conversion Rate

Number of JUMPSTART alumni who return to GOODProjects as paid peer mentors, camp counsellors, or youth advocates within 12 months of program completion.

Measures: pipeline sustainability and alumni investment in the next generation.

Household Income Trajectory (Two-Generation Impact)

Percentage of families in which both the youth participant AND their parent/caregiver experienced increased earned income or secure employment during the grant period, tracked through FSP coaching.

Measures: intergenerational economic mobility.

Relational Trust Retention Rate

Percentage of JUMPSTART participants who remain actively engaged with GOODProjects services (FSP coaching, GOODZone check-ins, wellness support) for 6+ months after internship placement, regardless of employment status.

Measures: sustained connection to safety nets.

Street Network Disengagement Rate

Percentage of youth who self-report reduced contact with street-involved peers or criminal activity involvement at 90-day follow-up compared to intake.

Measures: violence prevention and community safety impact.

Employer Repeat Hire Rate

Percentage of GOODZone Business Partners who hire a second GOODProjectsDC alumnus within the grant period after a successful first placement.

Measures: employer satisfaction and pipeline sustainability.

7. Measurable Outcomes

Metric	Target
Alumni complete 40-hour Career Launchpad Training	90%
Alumni complete 6-week paid internship with GOODZone Business Partner	85%
Alumni secure unsubsidized employment or post-secondary enrollment within 90 days	60%
Internship-to-permanent-hire conversion rate	40%
Employers report measurable soft skill improvement (pre/post survey)	75%

Secondary metrics tracked: average hourly wage at placement; employer retention at 6 and 12 months; youth self-reported professional confidence scores; parent household income trajectory through FSP.

8. Proven Track Record

Initiative	Results
Peer-to-Peer Mentoring (2021–Present)	Over 50 youth have served in paid and volunteer mentorship roles as "Free Talk with a Trusted Friend" peer mentors
Summer Camp & After-School Capacity	Alumni return as camp logistics coordinators, activity facilitators, and academic mentors — gaining structured work experience
Intern-to-Staff Pipeline	High-trust alumni serve as interns within GOODProjectsDC's own programming initiatives, learning time management, scheduling, facilitation, and client engagement
Nasdaq Women's Financial Literacy Program (2025)	15 women completed; all explored entrepreneurship; two launched registered businesses in Ward 6
SWBID Partnership	5 youth annually placed in paid stipend positions within the GOODProjects team — a direct precursor to the employer placement model
D.O.E.S. Collaboration	Active partnership aligning workforce pathways with District youth employment initiatives
Overall Alumni Engagement	Over 100 youth alumni engaged in paid and volunteer roles with zero incidents of violence or program disruption

9. Key Partnerships

DC Department of Employment Services (D.O.E.S.)

Aligns workforce pathways with District youth employment initiatives; provides access to employer networks and subsidized employment opportunities.

GOODZone Business Partners (Ward 6)

Provide paid internship placements; permanent hire opportunities for successful interns; pre/post employment surveys.

Southwest Business Improvement District (SWBID)

Workforce connection support; employer network access; annual stipend placements for 5 youth within GOODProjects team.

C3 Wellness

Trauma-informed care, therapy resources, and weekly wellness check-ins throughout the program pathway.

Dept of Parks & Recreation

GOODProjects operates from a place-based public recreational centre. King GreenLeaf Rec Centre, South West, DC

10. The 2030 Vision — Scale & Replication

With a decade of proof in Ward 6, GOODProjects is ready to scale. Our 2030 goals are:

- Replicate the model to additional wards, bringing the same integrated continuum of care to new communities across Washington, D.C.
- Deepen the evidence base through systematic SROI tracking, alumni follow-up, and longitudinal data collection that demonstrates sustainable, generational change.
- Build a data-driven donor case using verified numbers, alumni outcomes, and independent impact validation to attract and retain funders aligned with long-term community transformation.
- Fully operationalize JUMPSTART as the standard fourth phase of our continuum, ensuring every GOODLearningHub alumnus has a structured pathway to employment.

11. Funding Structure

The full GOODProjects continuum, from family stabilization to alumni employment, operates at an annual programming cost of \$1.8 million (approximately \$2 million). This investment funds a single, seamless ecosystem of care: not three or four separate programs, but one coordinated value chain that surrounds Ward 6 families from every angle.

The JUMPSTART phase is designed to be scalable based on funding availability:

Funding Scenario	Youth Served	Staffing
Full Implementation	30 youth	Workforce Development Coach (1.0 FTE), Internship & Placement Coordinator (1.0 FTE), SEL & Wellness Coach (0.5 FTE), Program Manager (0.15 FTE shared)
Scaled Implementation	15–20 youth	Shared staffing with existing FSP and GOODZone infrastructure

Core Per-Youth Costs (JUMPSTART)

- Paid internship stipends: \$1,800 per youth (6 weeks × 20 hrs/week × \$15/hr)
- Career Launchpad materials: \$50 per youth
- Transportation (MetroCards): \$50 per youth
- Wellness support: \$150 per youth
- Staff salaries: \$162,000 for full implementation

12. Invest in a Proven Ecosystem

By investing in GOODProjects, you are not funding four separate programs. You are funding a single, seamless ecosystem of care that surrounds families from every angle — indoors and out, from cradle to career, from crisis to stability.

These funds directly support:

- Family Success Coaches who stabilize homes and build pathways to financial independence.
- Youth Services Advocates who mentor the next generation at King Greenleaf.
- Credible Messengers and Crisis Intervention Specialists who interrupt violence and connect the hardest-to-reach to services.
- JUMPSTART Workforce Coaches and Placement Coordinators who ensure our alumni cross the finish line into employment.

GOODProjects has spent a decade raising a generation in Ward 6. JUMPSTART is the moment we deliver on that promise.
